

Park Control Made Easy

 **OPERA**
Amusement

Live maintenance system
for theme parks

“Now I can fill the rides checklist on the go, while all data are automatically stored”

Paperless procedures

Automatize and optimize your **paperless check list** and mandatory **LogBook** (or any report EN/ISO/ASTM compliant) with **portable devices**.

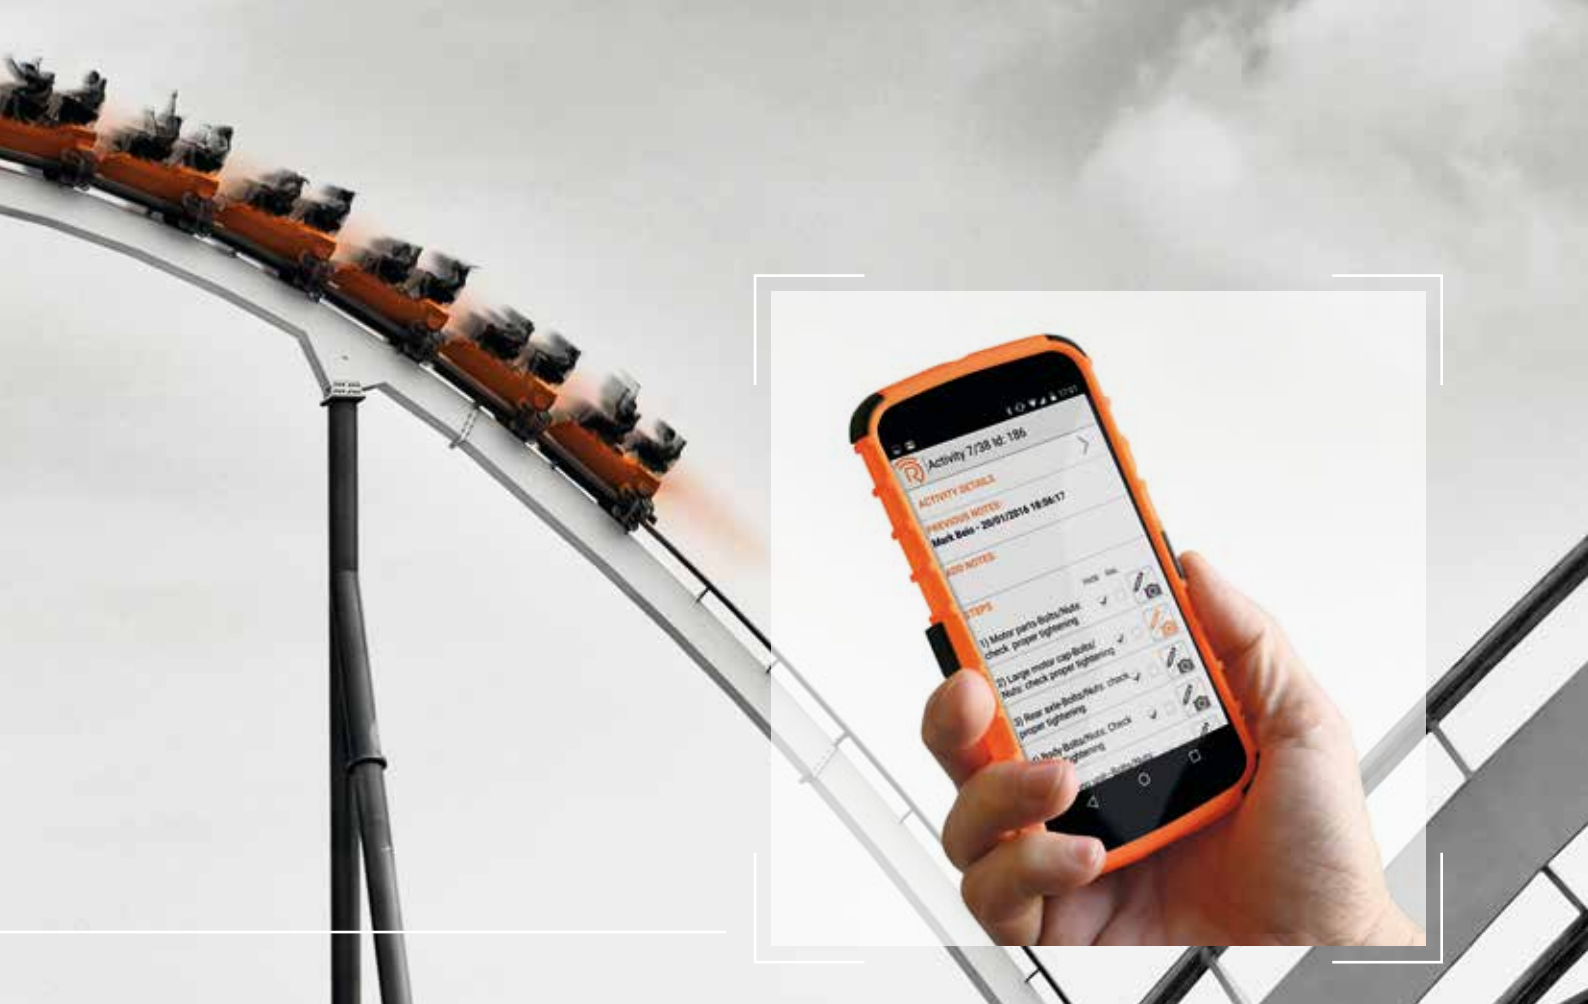

Maintenance Management

Manage maintenance and inspection works. “Proven maintenance” will demonstrate your compliance with all requirements.

Centralized repository

Store and organize all of your **documents** in a **centralized Data Base** and **secure**. **Share docs** with your **team** directly on site via **Android Apps**.

Ride checks made easy

Performances under control

Plan, Do, Check all working process in a common **dashboard** via ubiquitous **Web App**.

[NEW] Off-line working

Never stop your job, even when Wi-Fi coverage and data connection is of poor quality or completely absent... you will be able to **synchronize everything** as soon as the connection returns available.

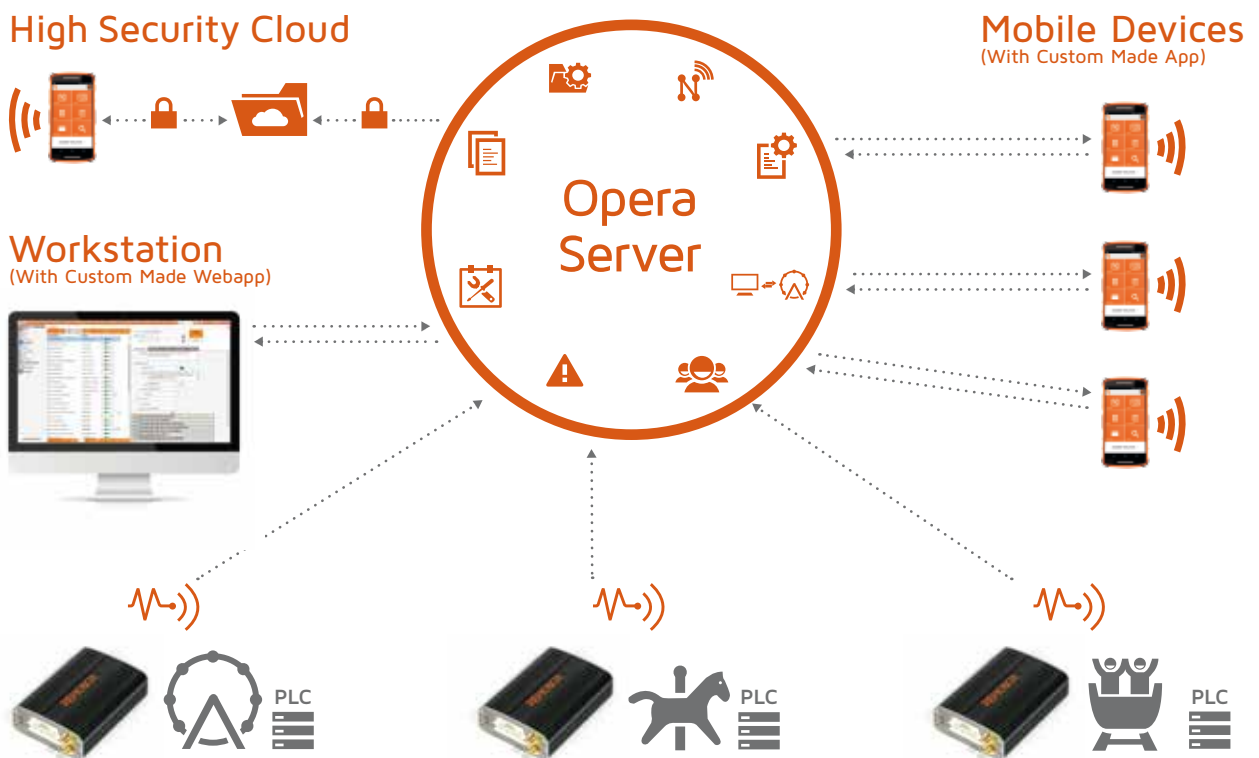

Rides Telemetry

You can **connect** your assets via a plug&play procedure, **log** all devices **data** and monitor the **real time status** of your assets.

“Finally a single system to manage all my park assets”

Managers, technicians, machines... connected

Maintenance Management

Opera CMMS manages your rides maintenance with a user friendly Activity Planning. All on site data (from Team or Rides) are real time tracked and stored.

Documents and Check lists Management

Designed to organize, make, store and view in mobility all relevant documents (check list, user manuals, drawings and any multimedia contents).

Logbook Management (EN/ISO/ASTM compliant)

Opera pre-sets and automatically fills ride LOG BOOKS with data coming from executed activities (e.g. modifications, improvement or replacement), ride alarms, inspections, reports,..

Spare Part Management

All Spare part information is completely classified and always available on web app or mobile devices via an interactive spare parts manuals.

Real Time Status (Ride Telemetry)

Proprietary hardware connected to the rides allow Opera to acquire data capable of triggering alarms or scheduling maintenance based on working hours.

Sensors Wireless Network

With Remorides Sensor Network (RSN), Opera extends ride knowledge by collecting additional data coming from any kind of sensors.

Team Collaboration

Opera supports team collaboration and knowledge sharing via its "private social platform" made by intranet electronic messages.

Remote Assistant (FUNCTION ON REQUEST)

Through a secure procedure, Opera secure Cloud service allows a remote access to the ride manufacturer for assistance or troubleshooting.

Real Time, Real Team, Real Benefits

Achieve paperless procedures: capitalize the potential of the new portable devices to reach “zero paper” process and “zero time” spent to fill and issue reports.

Increase the efficiency: simplify and bring to life the maintenance procedures and drive your team during troubleshooting activities by preloaded and detailed check lists.

Secure your future: track every single working step by the automatic audit trail procedure and insure you in front of the law.

And... optimise your spare parts order, communicate and share the knowledge with your team by push notifications, use a single dashboard to follow in real time the work orders, issue personalized reports with customized KPI, and more...

Compliance made easy

Opera is **compliant by design** with safety norms and standards, **EN-13814** or ISO-17842, ASTM F24 series applicable for amusement fields.

“With a simple click you can download the LOG BOOK of your rides completely filled with all needed information and ready for third bodies inspection”.

Opera takes care about your **critical information** and **secures** it with **encryption** and **backup** on its cloud space or on your own server.

“Your data is your knowledge and this is your safeguard in case of any dispute with law. A **secure** automatic backup ensures peaceful sleep”.
